DISCOVER VELEBIT ↓

WELCOME

Croatia's longest mountain range

Velebit stretches 145 km along the Adriatic coast — from Vratnik in the north to the Zrmanja in the south. Its canyons, forest trails, karst fields and ridges form one of Europe's finest hiking landscapes. From Paklenica to Zavižan, from Zavratinica to Dabarski kukovi, along the Premužić trail and in the underground halls of Cerovačke caves — every corner tells a different story of mountain, sea and subterranean world.

NATIONAL PARKS

UNESCO

WORLD HERITAGE

OI

NATIONAL PARK · UNESCO

Paklenica

A UNESCO-listed national park with Velika and Mala Paklenica — dramatic canyons cut into the southern slopes of Velebit, with cliffs up to 400 m high. Famous among hikers and climbers, with more than 150 km of marked trails and lush pine forest. Easily reached from Starigrad and Zadar — a perfect mountain day with the sea nearby.

- ♦ 150+ km of trails
- ♦ Climbing
- ♦ Pine forest

02

PROTECTED LANDSCAPE · ADRIATIC

Zavratnica Cove

A protected landscape and bay on the northern Adriatic, often called Croatia's fjord — steep cliffs, calm turquoise water over 900 metres long, reachable by boat from Jablanac or on foot. A perfect blend of mountain and sea.

- ♦ 900 m long
- ♦ Boat or trail
- ♦ Swimming & diving

03

HIKING TRAIL · ENGINEERING LANDMARK

Premužić Trail

The Premužić trail is one of the best-known hiking routes in Croatia and Europe. About 57 km long, it crosses the heart of Velebit — from Baške Oštarije to Ostarije along the central and northern ridge. Built in the 1930s to the design of Ante Premužić.

What makes it legendary is the dry-stone walling — hand-laid stone walls without mortar that safely guide you through steep terrain and along cliff edges. The trail winds through forest and limestone ridges with constant views of the Adriatic, Pag and Kvarner.

For Stars Peak guests in Bačić Duliba the trail is within easy reach — a shorter day section towards Dabarski kukovi or Alan, or a multi-day traverse with nights in mountain huts.

— Length: about 57 km (several stages, 3–5 days)

— Difficulty: moderate — suitable for fit and experienced hikers

— Direction: Baške Oštarije → Zavižan → Alan → Ostarije

— Access from Bačić Duliba: join the trail towards Alan and Dabarski kukovi

— Highlights: Rozanski kukovi, Veliki Lubenovac, Alan

◆ 57 km long ◆ Dry-stone walls ◆ Sea views ◆ Near Bačić Duliba

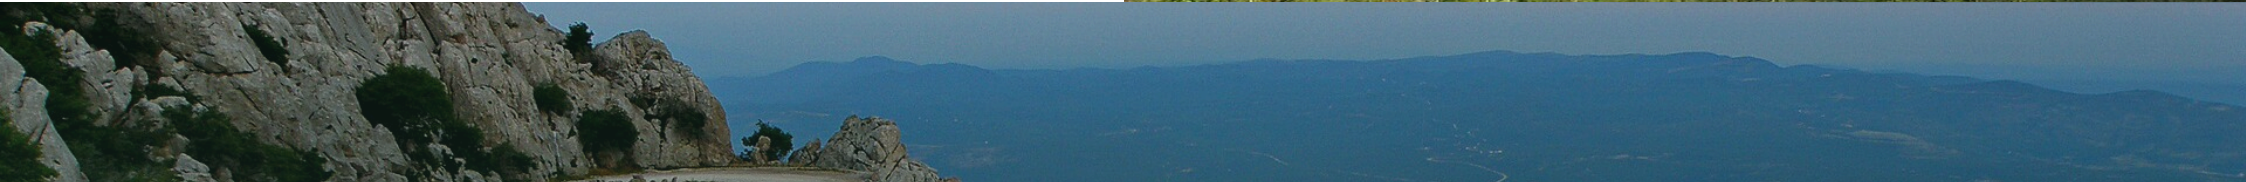

04

PEAKS · KARST · CENTRAL VELEBIT

Dabarski kukovi

Impressive limestone peaks of central Velebit — a group of towers above Bačić Duliba and Starigrad Podravanjski. Trails cross karst with panoramic views over Lika and the Adriatic. A favourite destination for local hikers and Stars Peak guests — ascents start directly from the mountain base.

◆ Karst & towers ◆ Panoramic views ◆ Near Bačić Duliba

NATIONAL PARK

Northern Velebit

Croatia's youngest national park (1999) protects the highest and wildest parts of Velebit. Rozanski kukovi, Štirovača, Veliki Lubenovac — trails through lush forest, endemic species and untouched landscapes. Part of the UNESCO World Heritage site Ancient and Primeval Beech Forests of the Carpathians and Other Regions of Europe.

05

1594 M A.S.L. · MOST VISITED PEAK

Zavižan

The Zavižan mountain hut — the highest accommodation in Croatia — stands at 1594 m with views of the Adriatic, Pag and all of northern Velebit. Nearby trails lead to Rozanski kukovi and Veliki Lubenovac. The weather station is known for extreme conditions and snow that can last until May.

♦ 1594 m a.s.l. ♦ Mountain hut ♦ Rozanski kukovi

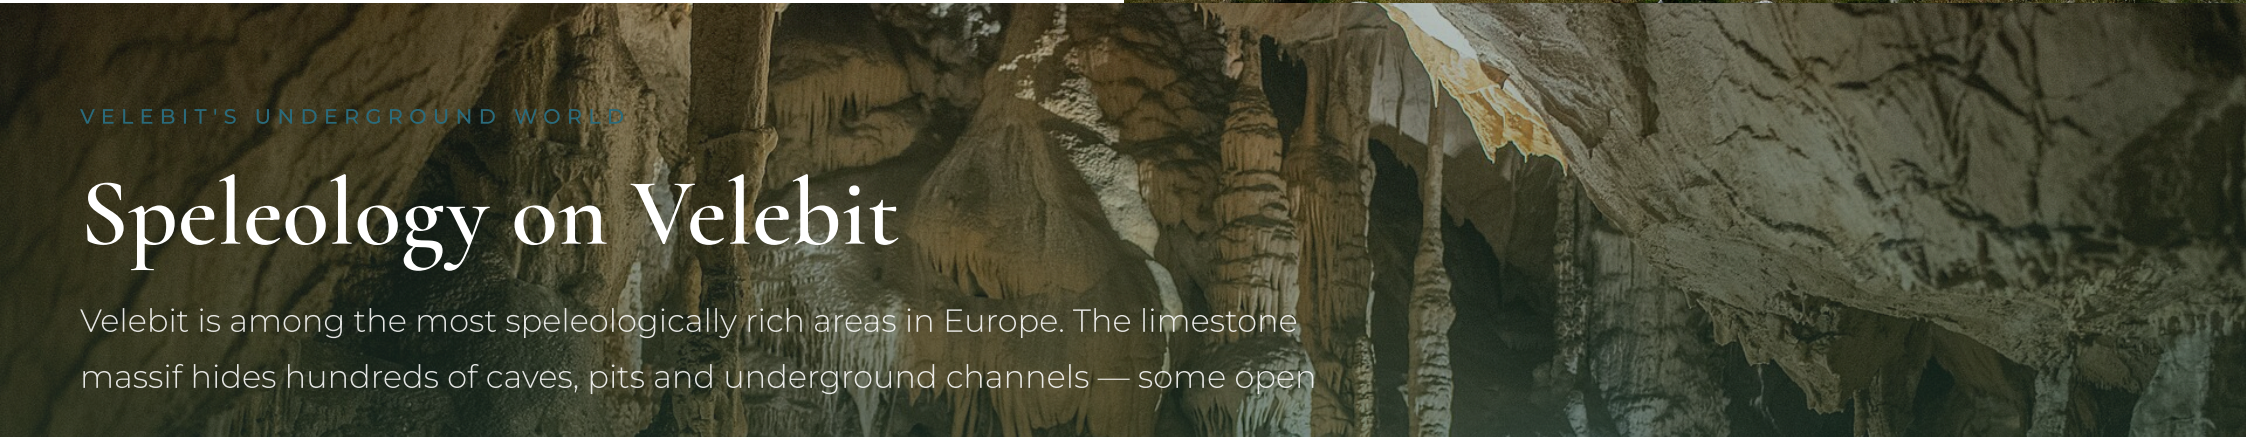

06

SOUTHERN VELEBIT · FILM LOCATION

Tulove grede

A spectacular ridge of southern Velebit — a group of limestone crags above Gračac. Famous as a Winnetou filming location and offering some of the most dramatic panoramas on the range. The trail crosses sparse karst with wide views over Lika.

♦ Winnetou location ♦ Limestone crags ♦ Southern Velebit

VELEBIT'S UNDERGROUND WORLD

Speleology on Velebit

Velebit is among the most speleologically rich areas in Europe. The limestone massif hides hundreds of caves, pits and underground channels — some open

to visitors, others accessible only to equipped cavers. The underground world preserves cave-bear fossils and Palaeolithic archaeological remains.

The best-known sites in southern and central Velebit include Cerovačke caves near Gračac, Modrič cave in Paklenica and Lukina jama in Velebit Nature Park. For Stars Peak guests, Cerovačke caves are an ideal outing — less than an hour's drive.

07

CEROVAČKE CAVES · SPELEOLOGICAL PARK

Cerovačke Caves

Cerovačke caves lie in Grab near Gračac, on the edge of southern Velebit. The system comprises three pits — Lower, Upper and New Cave — with more than 7 km of explored underground passages. Lower Cave is open to the public with guided tours.

The caves have yielded cave-bear remains (*Ursus spelaeus*) and Palaeolithic finds. Stalactites and stalagmites create impressive underground scenery — some chambers are tens of metres high.

Cerovačke caves are one of the few places in Croatia where you can experience the underground world without caving

equipment — safely, with expert guiding. A perfect add-on after hiking or swimming in Karlobag.

— Location: Grab, near Gračac — southern Velebit

— Visits: guided tours; bring warm clothing (10–12 °C)

— Duration: about 60 minutes per cave

— Season: spring to autumn (check opening hours)

— Nearby: Tulove grede, NP Paklenica, Modrič cave

♦ 7+ km of passages ♦ Cave bear ♦ Guided tours

♦ ~60 min from Stars Peak

08

ISLAND · ADRIATIC · GASTRONOMY

Pag Island

One of Croatia's sunniest islands, known for stone landscapes, beaches, Pag sheep and cheese. Linked to the mainland by bridge — perfect for a day trip from Velebit: mountain morning, beach afternoon.

♦ Pag cheese ♦ 2700+ sunny hours ♦ 30 min drive

09

COAST · SWIMMING · 30 MINUTES

Karlobag

The nearest seaside town on the Velebit coast — pebble beaches, waterfront cafés and a swim in the Adriatic before lunch. Just 30 minutes from Stars Peak in Bačić Duliba — mountain in the morning, Adriatic in the afternoon.

♦ 30 min from Velebit ♦ Pebble beaches ♦ Mountain & sea

Why visit Velebit?

A unique blend of alpine hiking and Mediterranean sea — in a single day.

Hiking

Trails for every level — from an easy walk in Zavratinica to demanding ascents of Dabarski kukovi and the Premužić trail.

Adriatic within reach

Karlobag, Zavratinica and Pag are half an hour away — morning at 900 m, afternoon in crystal-clear sea.

Biodiversity

Primeval forests, endemic species, bears and lynx — Velebit is one of Europe's most important habitats.

Speleology

Hundreds of caves in the limestone massif — Cerovačke caves, Modrič and Lukina jama. An underground world with cave-bear fossils.

Stars

No light pollution — Milky Way nights, ridge silence and skies rarely seen elsewhere.
